GENDER EQUALITY TOOLBOX FOR INCLUSIVE BUSINESS MODELS AND DEVELOPMENT PARTNERSHIPS WITH THE PRIVATE SECTOR

Women play an important role in agricultural systems in Mozambique, but face various challenges such as increasing productivity, accessing finance, technical equipment, extension services as well as representation and decision-making power in cooperatives/formal groups & associations. The toolbox provides a variety of simple, adaptable approaches and tools to improve the integration of female farmers and women wage workers in commercial businesses and agricultural value chains. The toolbox targets project advisors, practitioners and consultants when elaborating inclusive business models (InBM) and developing public private partnerships (DPP) in the agricultural sector in Mozambique.
